¹ Mangoes must be treated with a hot water dip at an APHIS approved facility in Haiti. Each box must be marked with the statement, "HOT WATER TREATED {PLANT NUMBER} HAITI." The shipment must be accompanied by the original copy of the PPQ Form 203 completed and signed by the APHIS officer on site in Haiti.

² If destined to a SAG location, then require T101-k-2. If *Cydia fabivora*, *Epinotia aporema*, or *Maruca testulalis* is found, go to page 2.27 for the correct regulatory action to take.

³ Limited to cultivars of *Citrus reticulata* (for example tangerine and Unshu orange), ethrog, grapefruit, kumquat, lemon, lime, limequat, orange, Persian lime, pummelo, sour orange, sweet lime, and ugli fruit.

⁴ Ivy gourd (*Coccinia grandis*) is prohibited into Hawaii.

⁵ Fruits receiving cold treatment may enter at these additional ports: Gulfport, MS; Seattle, WA; and Wilmington, NC.

⁶ If the prescribed refrigeration period is met upon arrival, the treated commodity may enter at any port of entry in the U.S. staffed by PPQ. However, if the prescribed refrigeration period is **unmet** upon arrival, then the commodity may enter only at a North Atlantic Port, Gulfport, MS; Seattle, WA; or Wilmington, NC.

⁷ If *Sagittaria sagittifolia*, refuse entry unless the importer has a valid PPQ Form 526 Permit. This noxious weed is prohibited by 7CFR 360--Noxious Weed Regulations.
